

Park City Area; US-40 Fiber Extension Project

Project Description: **Utility project**

This project will install approximately two miles of conduit and fiber optics beginning at milepost 2 on US-40. The project will connect maintenance station 2435 to the ATMS network as well as install a camera about ½ mile north of the SR-248 and US-40 interchange. Most of the work will be well off of the shoulder and should not affect traffic.

Total Project Budget: **Approx. \$400-thousand (current cost estimate)**

Anticipated Schedule: **This project is currently scheduled for construction during the 2006 construction season.**

NOTE: Schedule information listed above is estimated and could change without notice based on funding, scheduling constraints, stakeholder issues, and other unanticipated project elements.
